Current report

SYN-DR-6001 · Version 1

Status: Final

Last updated: 12 May 2025 10:45

Acknowledged by

SYN-PRAC-3001 (Clinic Physician)

Acknowledged: 12 May 2025 11:02

Current state

Follow-up Decision Required

You may record the follow-up direction.

1. Record human follow-up direction (You are the authorised actor)

Select exactly one direction. This is a recorded human decision, not a clinical recommendation.

- ☐

Clinic management

Patient remains under clinic care with a planned next step.

Requires owner, timeframe, next task and communication / confirmation evidence.
- ☐

Day-care referral

Refer to day-care service for appropriate management.

Creates Referral Created work (T09).
No receiving acceptance recorded here.
- ☐

Hospital escalation

Escalate to hospital for further assessment or management.

Creates Referral Created work (T09).
No receiving acceptance recorded here.

Rationale / evidence reference (required)

Provide the source or evidence that supports this direction.

e.g., Report section, clinical note, guideline reference, prior assessment

Source reference ID (e.g., EV, note, doc)

e.g., EV-045 or DOC-018

2A. If Clinic management is selected, complete all required fields (T08 requirements)

Clinic management owner (named person/team)

Timeframe / target date

Next task

Enter name or team

dd MMM yyyy

e.g., Review in 4 weeks

Communication / confirmation evidence (per policy)

Reference ID / note / document

Sent/delivered alone is not enough. Record the applicable confirmation evidence.

Select confirmation type

e.g., EV-060 or COMM-015

 Record direction — disabled until applicable evidence is complete

Cancel

Recording will capture: physician, acknowledged report version, selected direction, evidence reference and time.
This does not make a diagnosis or route a referral automatically.

ASHA'S JOURNEY

Result acknowledged

Human direction

Handoff / clinic follow-up

Current work: Clinic physician decides the next workflow route.

Next: Prepare the selected path; no route is chosen by AI.

GUIDANCE & SAFETY

- Only the Clinic physician can record a direction.
- Choose one of the three approved directions.
- AI cannot choose, rank, recommend or infer direction.
- Clinic management is not a default selection.
- Required evidence must be complete before recording.
- High-risk confirmation records EVT-11 once.

Report: SYN-DR-6001 · Version 1 (Acknowledged)

Package summary

Package ID	PKG-REF-2025-00078 · V1
Destination	Day-care service
Sent	29 May 2025, 11:05
Route	EHR Secure Message

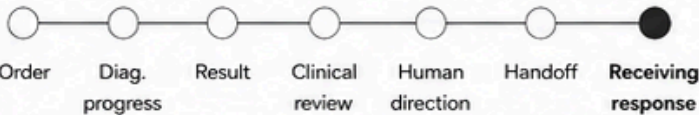

Notes

A referral being sent is not acceptance.
Acceptance is recorded by the receiving team.
Do not record a response on behalf of the team.

Required for recording

- ☐ Receiving-team decision actor
- ☐ Response (accept or reject)
- ☐ Destination and timeframe (if accepted)
- ☐ Rejection reason (if rejected)

ASHA'S JOURNEY

Handoff routed → [Receiving response] →
Next step confirmation

Current work

Receiving team responds to the human-approved package.

Next

Confirm accountable follow-up only after applicable evidence exists.

Episode health

Owner (direction)	Dr. Synthetic Physician (SYN-PRAC-3001)
Blocker	None
Due context	No due threshold set
Last updated	29 May 2025, 11:10

Audit evidence

EVT-14 Receiving response recorded (acceptance or rejection).

High-risk confirmation

Before recording, confirm the response, receiving-team decision actor, recording actor (if different), package/version, destination, and timeframe (if accepted) or rejection reason.

Record receiving response

Disabled until required fields are complete

Important: Acceptance by the receiving team does not confirm the next step or close the episode.
Required owner, timeframe, communication and other applicable confirmation evidence are handled on SCR-10.

Exception queue and exception detail

Signed in: Care Coordinator · SYN-COORD-2001
Case: Asha Mehta · SYN-PAT-1001 · Synthetic case

Purpose: Material workflow failures must be visible, owned and recoverable without silently attaching, advancing or closing the episode.
